

Windhaven Medical Imaging provides the highest quality outpatient imaging services to patients and referring physicians by combining cutting edge technology, radiology excellence, and unmatched service.

WINDHAVEN is setting the MRI quality standard by offering a G.E. Signa HDx 3T MRI system. In addition to our 3T MRI, we offer a G.E. Light-speed CT, Myelograms, Discograms, Arthrograms, Injection procedures, and X-ray services. Our local Radiology partners are well established in the Dallas market and Fellowship trained in Neuroradiology, Musculoskeletal, Interventional, and Pediatric imaging.

## Why Windhaven is your choice for diagnostic imaging

- ★ Highest quality images utilizing our 3T MRI
- ★ Neuro, Musculoskeletal, Interventional, & Pediatric Radiology
- ★ Online Viewing of images
- ★ Fast report turn-around
- ★ Conveniently located off the Dallas North Tollway at Windhaven Parkway
- ★ Patient scheduling, insurance verification, and pre-certification

## 3T MRI

With MRI, an accurate diagnosis depends on a high-quality scan. A high-quality scan provides a detailed view of a specific area of anatomy with optimal contrast, high image quality, and minimal "noise." At Windhaven Medical Imaging, our GE Signa HDx 3T MRI system has twice the field strength of a conventional magnet, allowing for faster patient exams and unparalleled high-definition MRIs. Our state-of-the-art system offers a better signal-to-noise ratio (SNR) and better image resolution.

## Computed Tomography (CT)

Windhaven Imaging proudly offers computed tomography (CT) with the 8-Slice GE LightSpeed system. This system allows us to diagnose a whole host of medical problems quickly and accurately. Such conditions include coronary artery disease, cancer, benign tumors, aneurysms, heart disease, lung disease, vascular disease, kidney problems, liver disease, musculoskeletal disorders, and more. Our technology helps physicians make an accurate diagnosis and may eliminate the need for other procedures, such as coronary angiography, exploratory surgery, and surgical biopsy.

## X-Ray/Fluoroscopy

### X-Ray

Windhaven offers x-ray services as a painless medical test to help diagnose and treat medical conditions. It involves exposing a part of the body to a small dose of ionizing radiation in order to produce pictures of the inside of the body. We provide a quick and friendly environment to diagnose broken bones, joint and spine injuries.

## Windhaven Medical Imaging

### Fluoroscopy

Fluoroscopy is a study of moving body structures – similar to an x-ray "movie." A continuous x-ray beam is passed through the body part being examined, and is transmitted to a TV-like monitor so that the body part and its motion can be seen in detail.

### Radiology Services

Windhaven Medical Imaging is proud to work with local, established, fellowship-trained radiologists. Our service oriented radiologists are accessible and responsive to your every need.

### Pediatric Imaging

At Windhaven, our commitment to compassionate, quality care shows in everything we do. Your patients' children will experience convenient, accessible, and conscientious imaging services and can be sure of outstanding quality care. Our dynamic and experienced pediatric radiology team and technologists have extensive pediatric imaging experience and an understanding of the special needs and concerns of children.
